

We talked about love
We talked about hate
We talked about sorrows
And all the things that we dont
Have lets not talk about it
About it about it we talked
About your fashion sales

We talked best friends
We talked about sex and money
Weve been talking about fame
Stop talking about it lets talk about
Our land so dark so grave
Is it ever gonna be the same
Fathers in the desert

And the mothers
Been really scared
Brothers been stabbed in the back
Bharatlyrics.com
And theres no one to blame

Who to be blamed
When its us whos doing it all
Do you think this stuffs gonna take
A load of so many lifeless bodies

Around you to surround you
You should stand up for your right
Stop the feeling, never subside
But the black called white

Cuz you're free
Free to be yourself
Free to build your world
If youre ever gonna change

Change for the better
Change for your brother one another
Can we talk about how we deal

With the so called technological
Lives this time we've come face to
Face with the truth when we talk
About the stars the stars have

Been tied on the face of the
Human race man killing man for a
Never ending struggle for power
Ultimate power is it ever gonna
Stop am i ever going to breathe
Love into my fierce lungs am i ever
Going to be free.
