

There something the way that she carry herself,  
Confidence is like she would marry herself,  
Usually i'm way to smooth and i play it cool,  
But she read me like a book got me actin like a fool,

Talking to her but i'm nervous,  
Throwing game and she curves it,  
She drivin this thang she swervin,

Its like she doing it on purpose,  
But i love the way she work it,  
Because at the end its gonna be worth it,

Tere vargiyan,  
Got me doin' things that i wouldn't do,  
Tere wargeeya,  
Got me feelin ways when i look at you,  
Tere vargiyan,  
Ik vaar dekh ke na bhulda,  
Tere wargeeya,  
Taiyon tere te main dulda,

Hamesha tere vargiyan te main dulda,  
Hamesha tere vargiyan te main dulda,  
Hamesha tere vargiyan te main dulda,

Bhavein bhulja any other one,  
Main tenu naiyo bhulda,

Tere vargiyan,  
Tere vargiyan,  
Always fallin for,

Tere vargiyan,  
Tere vargiyan,  
Always fallin for,

Tere vargiyan,  
Tere vargiyan,  
Always fallin for,

Tere wargeeya,  
Tere wargeeya,

I can't get enough of you,  
I won't let you leave, no..  
I can't get enough of you,  
I won't let you leave, no..

When i met you at this party in manhattan,  
From the time we started dancing,  
I felt a strong attraction with you,  
I knew i knew i knew,

What your loves been lacking,  
All i got is this passion for you,

I could be wrong,  
But i could be right about you,  
I could be wrong,  
But it won't feel right without you,

How you made me go the whole,  
Night without you,  
I know all about you,

Hamesha tere vargiyan te main dulda,  
Hamesha tere vargiyan te main dulda,  
Hamesha tere vargiyan te main dulda,

Bhavein bhulja any other one,  
Main tenu naiyo bhulda,

Tere vargiyan,  
Tere vargiyan,  
Always fallin for,

Tere vargiyan,  
Tere vargiyan,  
Bharatlyrics.com  
Always fallin for,

Tere vargiyan,  
Tere vargiyan,  
Always fallin for,

Tere wargeeya,  
Tere wargeeya,

Girls like you,

Tere vargiyan your type

It always girls like you,  
It always girls like you,

Always fallin for you,

I never knew,  
I never knew.
